W Amp

Transforms existing speakers into a music streaming system

Now you can play all the music on the internet through your favorite component loudspeakers with the Definitive Technology W Amp. It's a wireless streaming amplifier that delivers an audiophile-grade high-current digital signal with a power rating of 150 watts x 2 channels. Included are customized EQ settings for optimizing the performance when paired with Definitive Technology speakers, plus line level Subwoofer output and Left and Right channel line level inputs and outputs.

Custom Install (rack mount brackets included)

What Obsession Sounds Like

There's a fine line between loving music and being obsessed with it. When it comes to making music sound the best it can sound, we have a hard time believing that good enough is acceptable. It has to be flawless. Perfect. Uncompromising. In short, we think it would be crazy to give music anything less than everything it deserves.

Start with one, then add throughout your home

The W Amp is part of Definitive Technology's Wireless Collection which is an all-encompassing solution for distributing audiophile-grade music anywhere or everywhere in your home. Stream your favorite music services, internet radio and your personal digital music library all from your smartphone, tablet or computer.

Definitive Technology Apps

The free Definitive Technology App allows you to mix-and-match speakers with the open DTS PlayFi™ Technology standard and future-proof your home music solution. The Definitive Technology Utility App provides extended functionality, including product firmware updates, source selection (if applicable) and EQ settings for the W Amp and W Adapt.
