W7

Audiophile-grade wireless speaker

The W7 is Definitive Technology's ultra-compact, audiophile-grade wireless speaker, perfect for those who won't compromise on performance, even in smaller living spaces. The W7's "Tri-Polar" configuration radiates sound off of surrounding walls and gives it the unique cube-shape design. As a result, the soundstage is broad and natural timbre can be heard throughout a room.

What Obsession Sounds Like

There's a fine line between loving music and being obsessed with it. When it comes to making music sound the best it can sound, we have a hard time believing that good enough is acceptable. It has to be flawless. Perfect. Uncompromising. In short, we think it would be crazy to give music anything less than everything it deserves.

Start with one, then add throughout your home

The W7 is part of Definitive Technology's Wireless Collection which is an all-encompassing solution for distributing audiophile-grade music anywhere or everywhere in your home. Stream your favorite music services, internet radio and your personal digital music library all from your smartphone, tablet or computer.

Definitive Technology Apps

The free Definitive Technology App allows you to mix-and-match speakers with the open DTS PlayFi™ Technology standard and future-proof your home music solution. The Definitive Technology Utility App provides extended functionality, including product firmware updates, source selection (if applicable) and EQ settings for the W Amp and W Adapt.

Definitive Technology App
