W Adapt

Brings the latest music streaming services to existing audio systems

Definitive Technology's W Adapt is an easy, simple upgrade that transforms virtually any audio system into a streaming music system. The W Adapt connects easily with nearly any home theater receiver using the latest digital and analog connections. Hookups include an auxiliary input to connect to Blu-ray, DVD or cable/satellite box, digital outputs for connecting to a receiver, an optical input to connect from a TV and much more.

Custom Install (rack mount brackets included)

What Obsession Sounds Like

There's a fine line between loving music and being obsessed with it. When it comes to making music sound the best it can sound, we have a hard time believing that good enough is acceptable. It has to be flawless. Perfect. Uncompromising. In short, we think it would be crazy to give music anything less than everything it deserves.

Start with one, then add throughout your home

The W Adapt is part of Definitive Technology's Wireless Collection which is an all-encompassing solution for distributing audiophile-grade music anywhere or everywhere in your home. Stream your favorite music services, internet radio and your personal digital music library all from your smartphone, tablet or computer.

Definitive Technology Apps

The free Definitive Technology App allows you to mix-and-match speakers with the open DTS PlayFi™ Technology standard and future-proof your home music solution. The Definitive Technology Utility App provides extended functionality, including product firmware updates, source selection (if applicable) and EQ settings for the W Amp and W Adapt.
